Dear Kathleen Sebelius, Secretary of Health & Human Services,

Have you researched the effects of the birth control pill? FYI...it prevents implantation of a fertilized egg...which is a human life....

Did you know that those taking birth control pills starting at a young age battle breast cancer later in life?

What kind of 'health' is that?

What are you doing to our young women and to the medical profession?

Again, I am deeply saddened.

Sincerely,

Susan Gunn
